Using BeachNet+ with Windows 7
Using BeachNet+ with Windows 7

The following instructions describe how to use Windows 7 to connect to BeachNet+ and designate BeachNet+ as your default SSID (wireless network).

**NOTE:** To connect to BeachNet+, you must have a valid nine digit CampusID along with your BeachID password. If you have not activated your BeachID password, visit https://beachid.csulb.edu/. Also note that you will need to update your password on your mobile device whenever you update your BeachID password.

Connect to BeachNet+

1. Click the **Wireless Network** icon in the Windows Taskbar (typically located on the bottom right of your screen). It looks like a series of signal bars, and will have a yellow star on them if you’re currently connected to a wireless network.

2. Click on Open Network and Sharing Center

   ![Open Network and Sharing Center](image-url)
3. **Click Manage Wireless Networks**

4. **Click Add**
5. Click Manually create a network profile

6. Type in beachnet+ in the network name and select WPA2-Enterprise then click Next
7. Click Change connection settings
8. Click on the Security tab. Make sure the authentication method is Microsoft: Protected EAP (PEAP). Then click the Settings button.
9. Uncheck Validate server certificate and then click the Configure button

10. Uncheck Automatically use my Windows logon name then click OK

11. Click Advanced settings
beachnet+ Wireless Network Properties

**Security**

Security type: WPA2-Enterprise
Encryption type: AES

Choose a network authentication method:
Microsoft: Protected EAP (PEAP)

- Remember my credentials for this connection each time I'm logged on

Advanced settings

OK  Cancel
12. Check the Specify authentication mode and select User Authentication. Then click OK.

13. Click OK to exit the beachnet+ Wireless Network Properties window.

14. Click Close to save the new beachnet+ profile.

15. Connect to beachnet+ wireless
16. Enter your valid and active 9-digit CampusID and your BeachID password. **Note:** You will need to update your password on your mobile device whenever you update your BeachID password, otherwise your BeachNet+ connection will not work after a password update.

17. If you are prompted to Terminate or Connect, verify that the certificate contains the Radius Server name “its-wifiauth0x” and is signed by AddTrust External CA Root or InCommons CA. Then click Connect.
